

Record of Our Jumps

You will make two jumps. For each jump, measure to the nearest centimeter and to the nearest inch. Here's how to measure each jump:

Place a penny or other marker (or make a dot with chalk) where the Jumper's back heel lands. Measure from the starting line to the marker.

- 1 Record your two jumps.

First jump:

About _____ centimeters

About _____ inches

Second jump:

About _____ centimeters

About _____ inches

- 2 Circle the measurements of your longer jump.

You will complete the next question in Lesson 7-7.

- 3 Which standing jump length has the most Xs above it on your line plot? _____
